

SAFETY-KLEEN PREMIUM SOLVENT

A special blend of hydrocarbons formulated to effectively remove oils and greases from a variety of substrates.

- Flash Point > 140°F - eliminating the need to manage spent solvent as a RCRA hazardous ignitable waste.
- Low Vapor Pressure - In order to improve air quality and reduce the formation of ground level ozone (smog), some states and municipalities have imposed vapor pressure restrictions (i.e., how quickly a solvent evaporates) on solvents used in parts washers. Premium Solvent has a low vapor pressure, allowing you to meet cold-cleaning regulations that require a vapor pressure of <1.0 mmHg at 20°C.

FEDERAL/MILITARY SPECIFICATION SOLVENTS

MILITARY PRF-680 TYPE II (142°F) and **PRF-680 TYPE III** (215°F):

- A special blend of hydrocarbons formulated to meet the Department of Defense's (DOD) performance specification for Type II High Flash Point (SD-2) and Type III High Flash Point (SD-3) Degreasing Solvents
- Safety-Kleen is listed in the DOD's Qualified Products Database (QPL) as an approved supplier

PD-680 TYPE II (142°F):

- A special blend of hydrocarbons formulated to meet the Federal General Services Administration's (GSA) properties for Commercial Item Description (CID) A-A-59601A – Type II Dry Cleaning and Degreasing Solvent
- Safety-Kleen is listed on the GSA Schedule as an approved supplier

VOC-EXEMPT SOLVENTS

- Formulated to meet stringent Federal, State (e.g., Ozone Transport Commission), and local clean air regulations requiring a volatile organic carbon (VOC) concentration of < 25 g/L
- Certified by South Coast Air Quality Management District (SCAQMD) as a Clean Air Solvent (CAS)

QSOL™ 220 CLEANING SOLVENT (103°F):

- Formulated with parachlorobenzotrifluoride (PCBTF), an exempt VOC

QSOL™ 300 CLEANING SOLVENT (170°F):

- Formulated with decamethylcyclopentasiloxane, an exempt volatile completely methylated siloxane (VMS)

CLEAR CHOICE CLEANING SOLVENT (100% VOC EXEMPT ACETONE)

- Formulated to meet stringent Federal, State (e.g., Ozone Transport Commission), and local clean air regulations
- Great for cleaning wet ink and paint from presses and paint guns

ULTRA KLEEN SPRAY EQUIPMENT SOLUTION

- Specially-blended solvents specifically designed to clean auto body spray equipment, parts and lines

HEAVY DUTY LACQUER THINNER

- High-solvency, medium-drying thinner for lacquer
- Excellent for cleaning brushes and equipment immediately after use
